

Máquinas curvadoras de tubos y perfiles (piramidales y asimétricas) para la realización de radios grandes, disponiendo de una amplia gama de modelos desde máquinas con 2 rodillos arrastradotes y de regulación manual del rodillo de ataque para trabajos de cerrajería artesanal, hasta sofisticados modelos que disponen de 3 rodillos arrastradotes con control numérico, indicadas para obtener y reproducir con absoluta repetibilidad curvas de radios múltiples

The image shows two hydraulic profile bending machines from the CROMA series. The larger machine, CROMA 50, is positioned in the upper half, and the smaller one, CROMA 35, is in the lower half. Both machines are primarily red and white. They feature a vertical frame with two large rollers at the top for bending. A control panel with various buttons and a digital display is located on the front. A hand crank is mounted on top for manual adjustment. A foot pedal with a yellow top is connected to the side of each machine. The ISMA logo and a warning symbol are visible on the front panels. The background is a solid blue color.
